Lin-Bing Sun received his bachelor degree and master degree from China University of Mining and Technology under the supervision of Professor Xian-Yong Wei in 2002 and 2005, respectively. He received his Ph.D. from Nanjing University under the supervision of Professor Jian-Hua Zhu and Professor Yuan Chun in 2008. After that he joined the faculty of Nanjing Tech University. He was a postdoctoral research associate at Texas A&M University with Professor Hong-Cai Zhou in 2011-2012. Prof. Sun was selected as a member of various talent programs including the National Science Fund for Excellent Young Scholars.

Prof. Sun's current research interests focus on fabrication of porous functional materials (ranged from mesoporous molecular sieves to metal-organic frameworks and porous organic polymers) as well as their applications in adsorption and catalysis. He is the principal investigator of various projects such as the National Natural Science Foundation of China, the Distinguished Youth Foundation of Jiangsu Province, and the Fok Ying-Tong Education Foundation. His work has led to about 100 papers in peer-reviewed journals including *Chem. Rev.*, *Chem. Soc. Rev.*, *J. Am. Chem. Soc.*, *Angew. Chem. Int. Ed.*, and *AIChE J.* as well as around 20 patents. He also coauthored two books including Dictionary of Chemical Technology.
